

Lycoming County *Chesapeake Bay Tributary Strategy* Advisory Committee

Mission Statement:

To advise the County of Lycoming in developing a cost-effective strategy to address nutrient management and related wastewater and stormwater challenges.

Purpose Statement:

The Advisory Committee meets quarterly to review the policies, plans and procedures for establishing and administering a County-wide nutrient credit trading program. The CBTS is a proactive and direct response to PA DEP's and US EPA's requirements to improve the health of the Chesapeake Bay by improving the quality of our local waterways. The Advisory Committee offers a multi-disciplined, executive-level review of the County staff group's activity. The Advisory Committee will ensure that the County's CBTS is comprehensive in scope, thorough in analysis, and well-coordinated with all stakeholders. While the Advisory Committee has no decision-making power itself, the County Commissioners strongly consider the advice and recommendations of the Committee.
