Two-Part Landowner/Public Survey

Part 1 – Pollution-Reducing Practices

Part 2 – CAP Project Questions

LYCOMING COUNTY RESIDENTS ONLY

Please complete this short survey to help us gauge interest in participating in pollution-reducing practices on your property. By responding to this survey, you will be directly influencing how we implement Lycoming County’s clean water plan (A.K.A., Countywide Action Plan (CAP)).

This clean water plan is intended to be an implementable plan with the purpose of reducing nutrient pollution in our local waterways. It is our hope that these planning efforts will not only improve our water quality, but will also strengthen new and existing partnerships.

RETURN THIS SURVEY BY WEDNESDAY, JULY 7TH.

-By mail-

Lycoming County Courthouse
ATTN: Eve Adrian, PCD
48 West Third Street,
Williamsport, PA 17701

-By fax-

570-320-2135

-Or by email-

eadrian@lyco.org

More information about the CAP can be found at www.lyco.org/CWAP.

Contact Eve Adrian, Lycoming County Natural Resource Planner, for questions at eadrian@lyco.org or call 570-320-2130.

Name: _____

Municipality (if known): _____

Best way to reach you for follow-up (phone, email, mailing address): _____

Part 1 - Pollution-reducing practices

1. Are you interested in implementing voluntary pollution-reducing practices on your property (rain-capturing gardens, forested/grass buffer along streams, reducing or eliminating lawn fertilizer use, planting trees and/or native vegetation, installing pavement that is water permeable, etc.)?

Yes No Maybe

2. Are you already using pollution-reducing practices on your property (rain-capturing gardens, forested/grass buffer along streams, reducing or eliminating lawn fertilizer use, planting trees and/or native vegetation, installing pavement that is water permeable, etc.)?

Yes No Not sure

3. Please check all the practices you are interested in learning more about from the following list:

Rain-capturing gardens (rain gardens, detention basins, bioswales, etc.)

Planting trees

Forested buffers along streams

Planting native vegetation

Grass buffers along streams

Installing pavement that is water permeable (pervious surfaces or porous pavement)

Reducing or eliminating lawn fertilizer use

Other rain water runoff controls

4. Please check all the practices you are interested in implementing from the following list:

Rain-capturing gardens (rain gardens, detention basins, bioswales, etc.)

Forested buffers along streams

Grass buffers along streams

Reducing or eliminating lawn fertilizer use

Planting trees

Planting native vegetation

Installing pavement that is water permeable (pervious surfaces or porous pavement)

Other rain water runoff controls

5. What resources would you need to implement these projects?

Money Technical assistance Help with planting Maintenance

Something else _____

6. What questions or concerns do you have about these projects?:

Part 2 - CAP Project Questions

1. Out of the following projects listed in the CAP, what top 5 would you like to see implemented (list 1 through 5 in order of preference, 1 being your highest priority and 5 being your lowest)?

Conservation farming practices

More urban trees and native plantings

Stream bank improvements

More pavement that is water permeable (pervious surfaces or porous pavement)

More forested and grass stream buffers

Reduce lawn fertilizer use

2. Is there anything you'd change or add?

3. What advice would you like to share?

4. What questions do you have?

THANK YOU FOR YOUR TIME!

Your answers will help streamline our planning efforts, and any additional comments or feedback is always appreciated. Please feel free to share this survey with others.
