

## **Other Agency Coordination**

The subdivision and land development process frequently involves approvals, permits, and/or coordination with other regulatory agencies. In order to ensure a timely processing of the land development application we recommend that applicants contact the applicable agency as soon as possible. Below is a list of frequent approvals, permits, and/or coordination required by other agencies. Please note that this is not an all-inclusive list. For a detailed list of what will be required please contact the Lycoming County Planning Commission (LCPC) staff to determine a full list of required permits, approvals, and/or coordination.
